

The 41 estimated coordinates of the final singles model, by economic block

Open markers: at an active bound at the optimum (beta_l_age2_sm, beta_l_age2_sf) -- no standard error, by construction. Pinned, not estimated (10): beta_E_y2015, beta_E_y2017, beta_l0_f, beta_l0_m, beta_l_age2_f, beta_l_age2_m, beta_l_age_f, beta_l_age_m, beta_l_nkids_f, theta_l_f. On a singles-only frame the couples leisure block does not enter the objective; the two year dummies are pinned by configuration. No parameter count is published: R-233 sec.4 states 35 estimated parameters and nothing on disk reproduces 35; the operative numbers are k = 41 for information criteria and K_interior = 39 for inference (decision_log.md Entry 1 sec.2).
